## Work Experience

### Delibo

Chennai

Software Engineer

Feb 2024 - Current

- Develop and maintain Delibo (Smart Parcel Locker), a comprehensive E-commerce and parcel management application using Vue.js for web React native for Mobile.
- Implemented key features including locker booking system, product catalog, shopping cart, payment integration, and real-time order tracking.
- Contribute to the development of an IOT-based Locker Management System (PWA + Mobile app) for secure parcel delivery and rental services.
- Ensure seamless cross-platform compatibility and performance across Android, iOS and Web.

### Zithara

Hyderabad

Frontend Developer

Aug 2023 - Dec 2024

- Developed and enhanced scalable web applications using modern frontend frameworks and backend technology.
- Engineered and integrated a proprietary payment gateway and merchant onboarding system, streamlining financial transactions.
- Implemented targeted lead generation campaigns that expanded the merchant base and drove platform growth.
- Optimized application performance and improved existing features, resulting in enhanced user experience and business efficiency.

### Serial Experiments

Hyderabad

Trainee Developer

Mar 2022 - Aug 2023

- Developed and managed a loyalty rewards program integrated with CRM systems.
- Redesigned company website and CRM dashboards to improve user experience and functionality.
- Built lead management tools within the CRM, including direct messaging, engagement tracking , and prioritization features, resulting in accelerated lead conversion and business growth.
- Designed and implemented a secure RESTful API architecture to seamlessly connect frontend application with backend services and database systems.

## Projects

### Dine-Time

React Native, Node.js, Redux

Restaurant Table Booking App

Github

- Developed a cross-platform restaurant table booking app ("Dine-Time") using React Native, Node.js , and Firebase for real-time slot-based reservations.
- Implemented secure user authentication and react-time database sync using Firebase Authentication and Firestore.
- Built RESTful APIs in Node.js for managing restaurants, tables and booking operation with role-based access.

### Bhuyia

Vue.js, Vuex, Node.js, Quasar

Properties Details

Github

- Developed a full-stack real estate platform ("Bhuyia") using Vue.js, Quasar, and Node.js to enable user to get properties details
- Implemented an integrated EMI calculator for property financing with dynamic interest rate and tenure inputs
- Built responsive, border UI with Quasar Framework and optimized backend APIs for fast property listing and search.

## Technical Skills

### Strongest Areas

Data Structures, Algorithms

### Libraries/Frameworks

Vue.js, React.js, React Native, Javascript, Html, Css, Quasar, Tailwind, Node.js, Vuetify, Webpack, Git

### Database

MongoDB, Firebase

### Platforms

AWS, Vercel

## Education

### Chhattisgarh Institute of Technology.

Rajnandgaon, India

Mechanical

June. 2016 - May. 2020

- 7.5/10
